Introduction/Plan Overview:

No matter what our health problems may be, it is important that we are all recognized and respected as being the best source of information about ourselves and what is important to us. This plan can assist you to get the best possible care and support that is based on your values and preferences.

If you are unable to make decisions or communicate for yourself, this plan would help guide people you trust, your designated Health Care Agent and health professionals when providing your needed care and support. It will help you direct them to make every effort to honor your wishes. Sometimes, this may not be possible, due to limitations of a conservatorship if you are conserved, or because of lack of resources, such as placement at your preferred place of hospitalization.

If there is anything you do not care to answer, please draw a line through that section and initial on the line you draw as your response.
